DXC Assure Platform

Maximize the value of insurance software with secure cloud infrastructure

DXC Assure Platform helps insurers maximize the value of the DXC Technology software that is critical to their business, regardless of where they are on their transformation journeys. DXC Assure Platform, powered by Amazon Web Services, enables secure, high-performing software in a cloud-based environment, optimized for insurance using components developed by DXC.

Transforming insurance operations with DXC Assure Platform

Insurance companies face the challenge of modernizing legacy systems while maintaining operational efficiency and minimizing costs. These systems, often decades old, remain critical to business operations but often limit the ability to apply or adopt newer technology and process advantages.

Modernizing these systems is essential for insurers to stay competitive, improve the customer experience and leverage advanced technologies like artificial intelligence (AI) and cloud computing. However, the complexity and risk associated with such transformations are often significant barriers to adoption.

Assure Platform offers a comprehensive cloud-based environment built to maximize the value of insurance software. It provides a secure, high-performing and interconnected ecosystem of services and capabilities to support insurers on their digital transformation journeys.

Business benefits

- **Flexibility and adaptability.** Assure Platform meets insurers where they are, offering paths to maintain, extend or transform their systems.

- **Cost and risk reduction.** DXC Assure Cloud Accelerator's proven tools for cloud migration enable application code conversion, drawing from community-based innovation as well as best practices to bring automation as high as 40% for transformations.

- **Innovation enabler.** Assure Platform's robust set of data services enable rapid integration with advanced insurance solutions, operational insights and a full ecosystem of modern technologies.

- **Proven journey.** With 34 customers already on the platform, DXC combines continued investment along with our commitment to supporting our customers' digital transformations.

Platform highlights

- **DXC Assure Cloud.** Cloud-based hosting service powered by AWS, designed for DXC IP

- **DXC Assure Security.** State-of-the-art security capabilities and controls for compliance and modern cyber-defense protections

- **DXC Assure 360.** AI-enabled dashboard that provides business, technical and operational insights

- **Enterprise Link.** Robust catalog of APIs and events for integrating across your enterprise estate

Key benefits

- **Maximize existing investments.** Retain and enhance your current software while adopting new technologies.

- **Reduce costs and risks.** Achieve significant savings and minimize risks with our advanced tools.

- **Enhance functionality.** Leverage AI-driven insights and advanced components for improved operations.

- **Enable flexibility.** Adapt to your business needs with customizable and scalable solutions.

- **Enterprise Data Hub.** A rich set of data pipelines and optimized common data model aligned to business domains

- **Accelerators.** Cloud Accelerators that use AI, tools, standardization and reusable capabilities to fast-track migrations

With Assure Platform, insurers can modernize their operations, reduce costs and enhance functionality — so they can remain competitive in a rapidly evolving industry

DXC Assure Platform in action

Full-scale transformation is not always an option — or even the best option. With transformation success rates as low as 25% in the industry, many clients are looking for a risk-mitigated approach. Assure Platform is that proven option, as it already provides the foundation for more than 20 DXC insurance SaaS products with more than 30 customers.

Supporting DXC's Protect, Extend, Transform product strategy, Assure Platform provides heritage DXC applications a pathway to protect important customer-specific customization often made in less modern languages like COBOL and Assembler. DXC's industry-leading conversion and migration accelerators reduce migration-related activities by as much as 60%.

DXC Assure Platform supports heritage applications deployed in a cloud environment managed by DXC, with tooling to manage code and integration with complex and diverse estates. Our cloud-native services, including more than 80 AWS components curated from over 300 available, future-proof even the oldest set of business logic, enabling cybersecurity, elasticity and many more advantages native to cloud solutions.

DXC Assure Platform features

Assure Platform is a comprehensive cloud-based environment designed to maximize the value of existing insurance software. It offers secure, high-performing, interconnected solutions leveraging AI and ecosystem capabilities. Key features include DXC Assure Cloud, a cloud-based hosting service powered by AWS, and DXC Assure 360, an AI-enabled dashboard that provides business, technical and operational insights. The platform also includes DXC Assure 360 Console for flexible customization and configuration, DXC Assure Cloud Accelerator to expedite critical activities, and state-of-the-art cybersecurity capabilities. In addition, the Universal Data Store provides a common, rationalized view of insurance data, while DXC Enterprise Link serves as an integration hub connecting Assure Platform to existing installations. These features collectively enable insurers to modernize operations, reduce costs and enhance functionality.

DXC Assure Platform business value

Assure Platform enables flexibility, cost reduction and enhanced functionality. It meets insurers where they are, allowing them to maintain, extend or transform their systems based on their unique needs and timelines. From the DXC Assure Cloud Accelerator family of tools, Conversion Accelerator helps consolidate multiple installations, reducing both costs and risks. By integrating advanced insurance components and operational services, Assure Platform enhances existing systems without requiring a complete overhaul. In addition, DXC's extensive customer engagement ensures the platform evolves based on customer feedback, providing solutions that address actual challenges facing insurers. With 14,500 dedicated insurance professionals, DXC offers robust support for effective management and enhancement of insurance platforms.

Why DXC?

DXC is the number one provider of core insurance systems, serving over 1,900 insurance customers — 80 percent of whom are in the Fortune Global 500. DXC brings more than 40 years of industry domain knowledge and experience in enabling customers to modernize their technology estates and simultaneously build new digital capability — the dual agenda.
