

Enhance digital employee experiences with DXC Modern Workplace for Apple

Fuel recruitment, retention, and productivity by giving employees what they want: Mac devices backed by seamless support services.

Mac devices are enhancing productivity and employee satisfaction, positively contributing to brand reputation, talent acquisition, and retention rates, according to a commissioned study by Forrester Consulting on behalf of Apple.* Studies have also shown:

60% fewer support tickets are filed per device with Mac, reducing downtime and allowing employees to focus on their work.*

45 minutes saved per month on device start-up and updates with Mac, letting employees get started faster and remain productive.*

3 out of 4 employees will choose Mac when given the choice.#

HR leaders want to deliver an exceptional employee experience for every single user. Now, there's a business case to support it.

Did you know?

By incorporating Mac devices into the enterprise, either as a standard offering or through a device choice program, **businesses can elevate their digital employee experiences (DEX)**, attract and retain talent, reduce overall device costs, and boost security, IT efficiency, and productivity.

When given a choice, three out of four employees will choose Mac.# Enterprises can reimagine the Mac experience to support, engage, and empower employees to do their best work.

60%

Fewer tickets filed per device per year when using Mac.*

90%

Reduction in risk of exposure from a data breach due to a lost or stolen asset, to protect employee data.*

20%

Improved staff retention rate for Cisco employees that use Mac.#

Give employees the **choice to use the Apple technology** they love and deliver rich employee experiences while doing so.

Happy and engaged employees perform at their best.
