

Strengthen your security posture with DXC's security-first approach to workplace services

DXC Modern Workplace for Apple gives cybersecurity leaders secure workplace solutions to confidently protect their data and ensure regulatory compliance.

Secure workplace solutions

Cybersecurity leaders need workplace services partners who will share the responsibility of developing, deploying, and maintaining secure digital products and services.

DXC Modern Workplace is built on security-first principles. When we combine **Apple's industry-renowned security principles** with our own, we deliver a more secure environment for organisations choosing DXC Modern Workplace and Mac.

Security-first approach

Apple

Builds security into the very foundation of its platforms.

Integrates hardware, software, and services that work together to maximise security while delivering a seamless user experience.

DXC

Offers strategy and advisory services to help organisations implement Secure-by-Design concepts effectively.

Possesses deep industry knowledge, security professionals, and an end-to-end portfolio of solutions.

Manages Apple devices to maximise security investments by leveraging built-in security features to their full potential.

Risk management

Apple

Constrains what applications can do and where they can run, reducing certain risks by design.

Aligns its platform security guide closely with industry standards, providing a solid foundation for risk management.

DXC

Delivers comprehensive risk management services, including risk and compliance management, data governance, and privacy services.

Interprets how general security principles apply to Apple's unique ecosystem, ensuring that risk management strategies are both effective and appropriate for organisations using Apple devices.

Event logging and telemetry

Apple

Provides a unique unified logging framework and an endpoint security framework that work together to provide curated, relevant telemetry data for security decision-making.

Sends fewer, but more meaningful, data points to the SIEM, reducing the noise in security monitoring.

Delivers cost savings with fewer logs, while simultaneously avoiding gigabytes of logs that are difficult to parse for relevant information.

DXC

Leverages this efficient logging and telemetry system in its security operations centres (SOCs).

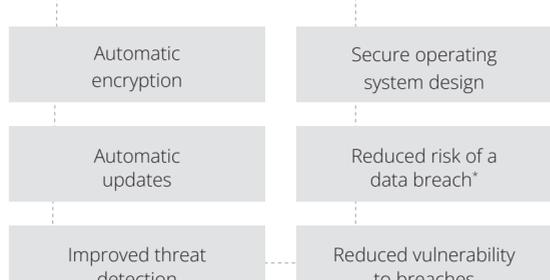

Interprets Apple's telemetry expertly for more effective monitoring and better orchestration of security responses.

Offers more responsive SOC's that make informed decisions based on curated and refined data that supports actionable insights and rapid incident response capabilities.

Improve your organisation's security posture with DXC Modern Workplace for Apple

Apple's fundamental device architecture

Impactful results from a commissioned study by Forrester Consulting on behalf of Apple*

15%

Lower risk of exposure from a breach due to an external attack or internal incident with Mac.

90%

Lower risk of exposure to a lost or stolen asset with Mac.

Secure stakeholder trust

Achieve a standardised level of security and risk management, protect sensitive data, and maintain trust with customers and stakeholders. Apple's technology architecture combined with DXC's Modern Workplace and security expertise helps organisations secure regulatory compliance, reduce the attack surface, and prevent vulnerabilities from being introduced in the first place, making systems inherently more resistant to security breaches.

Zero-touch deployment, security and compliance, and automated management

Improve operational efficiency with DXC's 60 remote support centres

Integrated OS support and AppleCare for Enterprise

DXC's service desk covers all IT support needs for the Mac environment

Built-in enterprise security, infrastructure integration (Apple Business Manager), device optimisation, and user support

Choose DXC for your Mac needs

DXC Technology is one of a select few authorised Apple Managed Service Providers (MSPs)

DXC manages more than 700,000 Apple devices worldwide.

DXC delivers Tier 1 support for every Apple device.

DXC provides world-class MDM support through Jamf and Microsoft Intune integration.

As an Apple MSP, DXC can offer Device Procurement Services, Apple Financial Services, Apple Professional Services, and Integrated Service Desk offerings accessing AppleCare for enterprise and AppleCare OS Support.
