

**Cisco Meraki  
SD-WAN managed  
by DXC Technology**

# Save costs, increase security, and boost performance with Cisco Meraki SD-WAN managed by DXC Technology

Whether you're managing tens or thousands of locations, a Software-Defined Wide Area Network (SD-WAN) simplifies network management.

## Network infrastructure must be modernised for transformation projects to be successful.

Many organisations are operating in the cloud without comprehensive on-premises and cloud-based security or the ability to transition to a Secure Access Service Edge (SASE) architecture where and when it is needed, in a secure and agile manner.

*Organisations can now ensure that staff have the same level of protection and access to the corporate network, wherever they are working.*

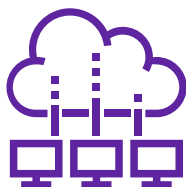

## High carriage costs through traditional multiprotocol label switching (MPLS) continue to impact bottom lines.

Switching from legacy fixed network carrier WAN services allows carrier independence and the ability to take advantage of low-cost internet connections via the NBN.

*This also significantly reduces operational costs.*

*Cisco Meraki SD-WAN managed by DXC Technology lets network and IT teams deliver reliable connectivity, application performance, and security over networks and services they don't own or directly control while achieving significant cost reduction benefits.*

## Poor application performance and lack of visibility into network and application performance continues to plague traditional networks.

End-to-end visibility, segmentation policy management, and security enforcement across the network with a single WAN fabric overcomes the challenges of packet loss, latency, and jitter to deliver the highest levels of application performance and quality of experience (QoEx) to users.

*Intelligent application-aware traffic management delivers superior end-user experience and detailed traffic statistics for trending enable capacity planning and much faster resolution of any issues.*

# Unleash the power of your network

## Why DXC Technology

As a Cisco Gold partner, DXC has deep experience in automation, custom application development, and implementation. Our team is accredited and certified in over 200 Cisco products and has successfully delivered and managed Cisco solutions for over 20 years.

## Award-winning

Cisco Meraki SD-WAN is integrated into DXC's award-winning 24/7 proactive operational support centres, delivering complete solution management.

## Fully managed solution

DXC Technology manages multiple carriers, security, quality of service (QoS), firewall, intrusion protection system/intrusion detection system (IPS/IDS), and URL filtering policies across enterprise networks, regardless of underlying carrier service providers.

## Proactive

Network-wide coordinated performance is guaranteed, regardless of where applications are hosted, providing deep monitoring and ensuring fast root-cause analysis.

## Seamless

Intelligent application-aware traffic management delivers superior end-user experience that supports employees in their day-to-day deliverables.

## Full visibility

Detailed traffic statistics for trending, real-time analysis, anomaly detection, and improved awareness. These insights assist with capacity planning and rapid isolation and resolution of operational incidents.

## Rapid

Simplification of provisioning and ongoing operations via DXC's investment in deployment automation, operational analytics, and business intelligence.

# 50%

reduction in time and effort for solution deployment

Up to

# 40%

savings on carriage costs

# 24/7

management and monitoring

# 200+

accredited and certified Cisco products

## About Cisco Meraki SD-WAN managed by DXC Technology

Cisco Meraki SD-WAN is a hosted cloud management platform that enables scalable and secure deployment of next generation customer networks, providing secure scalable network user access and network connectivity to internal and external cloud solutions.

Taking a consultancy-led approach, we help our customers modernise their IT infrastructure and optimise how they run it to reduce operational and support costs. To achieve this, we have invested heavily in our in-house expertise and our partner relationship with Cisco to deliver best-of-breed expertise and managed services aligned to the world's market-leading SD-WAN technology provider.

DXC has been a Cisco Gold partner for over 20 years, holding the highest-level accreditations across all of Cisco's core architectures and successfully delivering thousands of Cisco-based projects across Australia and New Zealand.

To learn how Cisco Meraki SD-WAN managed by DXC Technology could reduce the overall costs and increase the agility of your enterprise network, connect with us at:
