- Gain greater business agility

# DXC Technology and Cisco

A partnership that has supported the transformation of IT infrastructure through proven and integrated networking, mobility, collaboration, data centre and cloud technologies for over 20 years. DXC is a Cisco Gold partner holding the highest-level accreditations across all of Cisco's core architectures.

Over 200 DXC resources accredited and certified in Cisco's products

Industry-leading Cisco automation capabilities to reduce deployment and operational costs

Improving business agility, flexibility, sustainability, and governance

Enabling digital transformation and IT infrastructure modernisation

## The DXC and Cisco difference

### Accelerating digital transformation through the network

We design, deploy, and operate networks, built on Cisco infrastructure, that are adaptable, enable real-time policy application, and integrate world-class security.

### Delivering business outcomes

DXC Technology ensures that projects are delivered successfully and that our customers realise the benefits of their Cisco technology adoption.

### Enabling infrastructure automation

Deploy and manage IT infrastructure with reduced time and risk. DXC is the first Cisco partner in Australia to achieve the Cisco DevNet Specialisation.

### Designing industry-relevant solutions

Working with complementary vendors, industry-specific applications and technology providers helps us deliver tailored business outcomes.
