

A vertical rocket launch is depicted against a dark, star-filled space background. The rocket is white with red and blue accents and is ascending, leaving a large, billowing plume of white smoke and fire. The plume transitions from white at the bottom to a bright orange and yellow glow near the rocket's engines.

**DXC Red Rock
services for Oracle®
Infrastructure as a
Service (IaaS)**

More resource and scope to innovate.

It's time to rethink your corporate data centre strategy. The performance, flexibility, security and cost benefits available with Infrastructure as a Service (IaaS) allow you to spend less time, money and resource on managing and maintaining on-premise environments. Instead, using technology to innovate and add tangible business value.

So, the time is ripe to review your enterprise application infrastructure requirements and make the switch from traditional hosted infrastructure to Cloud. But the question is: with which IaaS solution will you see the greatest performance benefits, IT cost reductions, and security - all key considerations for your enterprise workload. The facts, along with our leading-edge IaaS experience at DXC Red Rock, point to Oracle Cloud Infrastructure (OCI).

Why Oracle and DXC Red Rock?

Oracle has established itself as a pioneering market leader in enterprise level Cloud infrastructure. Providing software-defined virtualised data centres in Oracle Cloud and a range of cost-effective, highly elastic compute, storage and network resources, Oracle enables your organisation to migrate quickly and easily, taking your existing software stack with you.

Red Rock is your re-platforming partner of choice. Being awarded Oracle Managed Service Provider status provides assurance that your Cloud workload implementation will be safely managed.

The result is a rapid transition to the benefits of a Cloud infrastructure solution, freeing up your people to focus on strategic opportunities to innovate and add real business value.

With Red Rock, National Pharmacies transitioned to Oracle's Australian data centre for Cloud infrastructure. "We see innovation as a disruptor with our competitors. It's allowed us to rewrite our next few years, so we can now really target consumers. Making it easy for our consumer is our primary goal."

Ryan Klose
General Manager Of Corporate Services,
National Pharmacies

“DXC Red Rock clearly understood our business objectives and has a very strong understanding of how to transform our legacy environments to the new world of Oracle Cloud.”

Glenda Salgado
Corporate Support
Services Manager
Clough

“I would recommend DXC to anyone looking to modernise their ERP. We squeezed every dollar of value we could out of this project and then a little more. That was possible due to DXC’s expertise and the time taken in planning and design. We achieved a solution that will work for us now and into the future.”

Chris Budasi
Assistant General Manager of
Administration and Support
Guam Waterworks Authority

Oracle IaaS solutions are not only more cost effective than traditional on-premise products, but also faster and cheaper than comparable IaaS solutions.

Migrate your ERP software.
