

Assure POINT

End-to-end Property & Casualty
suite

At a glance

End-to-end P&C suite

Policy, billing, claims and
reinsurance connected across
one platform

Margin-focused operations

Reduce drag, improve speed
and create margin gains across
the insurance life cycle

Flexible adoption

Deploy the full suite, start with
components or add Smart Apps
to existing systems

Protect margin momentum while moving your P&C business forward

Property & Casualty (P&C) carriers may be seeing stronger profitability, but pressure to sustain margins remains. Assure POINT connects policy, billing, claims and reinsurance so teams can reduce operational drag, improve speed and create margin gains.

With DXC Technology, modernization does not require abandonment. Adopt the full suite, start with components or use AI-powered Smart Apps to create targeted value while preserving what works.

What Assure POINT delivers

- A practical path to modernize core operations without a disruptive all-or-nothing transformation
- Configurable underwriting, rating, issuance and renewals to speed product updates across personal, commercial, specialty and workers' compensation lines
- Integrated billing with policy and claims data that improves financial accuracy and reduces silos
- Claims processing from First Notice of Loss (FNOL) through settlement with AI-assisted intake, configurable workflows and compliance controls
- AI-powered Smart Apps that deliver focused improvements in claims, underwriting and engagement without waiting for a full core replacement
- Embedded compliance, security and continuous updates to support regulatory alignment and platform reliability

Flexible adoption — suite or components

- **Full suite.** Deploy Assure POINT end to end for operational efficiency, and lower total cost across the life cycle.
- **Component approach.** Start with Assure Claims or Assure Billing, then expand as needs evolve to the full platform over time.
- **Smart Apps overlay.** Layer AI-powered Smart Apps on existing or core systems for faster gains in claims, engagement and underwriting.
- **Incremental modernization.** Wrap and extend existing legacy systems through Assure Platform, reducing technical debt while adding new digital capabilities without disruption.
