

DXC Insurance Software & BPS

Intelligent Insurance —
secure, scalable, smart

Insurers must deliver results today while preparing for tomorrow. DXC Technology is delivering rapid value while accelerating the journey to an intelligent enterprise.

Key benefits

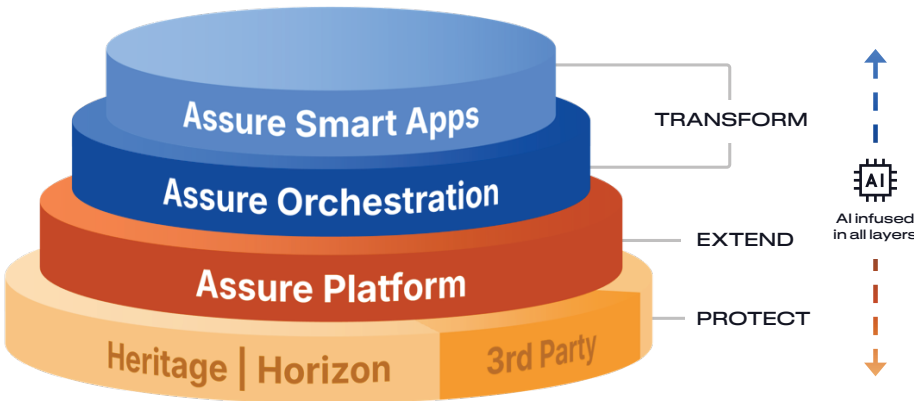

- Accelerate innovation without disrupting core systems
- Reduce risk with AI governance
- Take products to market faster
- Improve operational efficiency and productivity

Intelligent Insurance is about outcomes. It's about turning innovation into measurable impact — accelerating growth, increasing efficiency and expanding capability.

That requires moving away from large, linear transformation programs and toward change that builds over time. It means focusing less on automating tasks and more on delivering results. And it means recognizing insurance can change without breaking.

That belief underpins DXC's Protect, Extend, Transform strategy: protect and modernize existing investments, extend value through integration and cloud, and target transformation where it delivers the greatest impact, without wholesale replacement.

Assure Architecture

- Assure Smart Apps:** Agentic AI role-based workflows that go fast and scale
- Assure Orchestration:** Workflows, agents, LLMs and guardrails that form the “brains” of operational intelligence
- Assure Platform:** Security, APIs, cloud and governance that allow “build once, reuse everywhere” integration
- Heritage and Horizon Solutions:** Trusted systems of record, protected and enhanced

Insurance runs on DXC

DXC Insurance Software & BPS brings together the core systems, platform, orchestration and agentic AI workflow capabilities that insurers need to run today's business while preparing them for what comes next.

Whether the priority is to improve a specific process, extend the value of existing technologies or replace them, DXC provides the right answer combination, tailored to what will most help move the customer's business forward profitably.

- DXC meets insurance industry customers where they are — protecting what's working, extending value where it counts, and transforming where it delivers the most.
- A global community of 1,000+ insurers shapes direction, validates innovation, and creates a network effect that no single-insurer relationship can replicate.

The result: Whether that means optimizing what is already in place or moving to something new, DXC's customers achieve a more flexible path that protects proven investments, extends critical capabilities, and transforms where it creates measurable value.

From insurance technologies to business processing services, DXC supports the modernization path that fits the customer.

The DXC difference

Helping insurers modernize without disruption, delivering speed and confidence:

Modernize without disruption: Improve outcomes while preserving the systems of record that support your business.

Scale with specialization: Combine insurance-specific platforms, operating knowledge, delivery experience and global reach.

Flexible transformation paths: Move at a pace aligned to business readiness, risk appetite, operating priorities and value potential.

AI with practical value: Bring automation, orchestration and role-based intelligence into insurance operations where it can improve speed, insight and execution.

More than a point solution: Connect software, services, BPS, AI, data, modernization and operating expertise across the business instead of addressing one isolated need at a time.

DXC experts bring deep insurance and technical expertise to more than **1,000 industry customers worldwide, spanning Life & Wealth, Property & Casualty, and Commercial & Specialty.**
