

DXC Cisco SASE with Secure Access Zero-Trust Everywhere for Everybody

DXC Cisco SASE with Secure Access unifies networking and security in a single cloud platform, delivering secure access everywhere, consistent policy enforcement and simplified operations. Learn how you can accelerate your Zero Trust journey with DXC's network modernization capabilities and industrialized managed services.

The Challenge

Distributed workforces, multi-cloud sprawl, and fragmented security tools have made traditional perimeter defenses obsolete. Organizations need a unified approach that protects users wherever they work, without adding complexity to IT operations.

Our Solution

DXC delivers Cisco integrated SASE as a fully managed service combining Cisco SD-WAN with Cisco Secure Access into a single cloud-native platform. One policy engine. One threat intelligence fabric. One management console.

One Platform, One View

Our managed services interconnect SASE components seamlessly to provide:

- **A Unified Policy:** Create a policy once and enforce it everywhere.
- **Shared Threat Intelligence:** Detect a threat in one area and instantly share it across the ecosystem.
- **Centralized Management:** Monitor the entire solution from a unified set of dashboards.
- **AI Assistance:** Leverages AI and machine learning for automated network operations and intelligent protection of AI-driven workloads.

DXC + CISCO

Modernizing at Enterprise Scale

DXC and Cisco modernize technology for global enterprises through a strategic partnership that unifies Cisco's industry-leading networking and security innovation with DXC's expertise in mission-critical managed services.

Together, DXC and Cisco serve some of the world's most complex organizations – particularly in Aerospace & Defense, Financial Services, and Manufacturing.

- **Global Governance:** Combines Cisco's world-leading technology with DXC's global delivery and AI-driven operational tooling to over 70 countries.
- **Unified Analytics:** Consolidates tooling by feeding Cisco telemetry into DXC AIOps for proactive incident resolution.
- **Optimized Supply Chain:** Ensures global hardware availability.
- **Accelerated Transformation:** Uses validated Cisco architectures and DXC methodologies to simplify operations and reduce project risk.

DXC Service for Cisco Integrated SASE

The DXC Advantage

DXC is your first-line support for every incident (hardware and software). We coordinate directly with Cisco TAC and third-party vendors so that you never chase multiple suppliers. One call. One team. One resolution path.

Our 24x7 Agentic SOC detects, triages, and remediates threats in real time, correlating intelligence from Cisco Talos and DXC OASIS. Every incident is classified (P1-P4) against defined SLA targets, with vulnerability advisories delivered proactively.

Governance That Drives Continuous Improvement

- Weekly operational reports keep you informed.
- Monthly service reviews with your Customer Delivery Manager track SLA performance and optimization opportunities.
- Quarterly executive reviews align the service to your evolving business strategy.

Getting Started

Every engagement follows DXC's proven path:

- Advisory to define the right workload
- Solutioning to architect the environment
- Migration to deliver without disruption
- Intelligent Operations to establish lasting confidence, powered by DXC OASIS, our AI-driven operations platform.

Let DXC experts guide you in building proactive, enterprise-wide resilience. Bring transparency, governance, and operational excellence to your critical systems, improving business continuity, recovery readiness, and overall operational agility. Contact us at network-growth@dxccom. Learn more about how to reap the full benefits of DXC Network Services at dxccom/solutions/cloud-and-infrastructure/network

What We Deliver

24x7 global managed services powered by DXC OASIS, our agentic AI platform that unifies signals across your entire IT estate, predicts issues before they hit, and automates routine operations at scale. OASIS is Integration-agnostic and is built on 60 years of delivering mission-critical services.

SD-WAN

SD-WAN Intelligent Connectivity

- Application-aware routing
- Roaming module
- SD-WAN DIA (Direct Internet Access)
- IPSEC tunnels
- Proxy Chaining, PAC (Proxy Auto-Configuration)

SSE Internet Access & CASB

Secure Internet Access (SIA)

- Secure web gateway (proxy web traffic, URL filtering, content filtering, advanced app controls)
- Cloud Access Security Broker (CASB) - Cloud app discovery, risk scoring, blocking, cloud malware detection; tenant controls
- Roaming module, SD-WAN DIA, IPSEC tunnels, PAC, Proxy Chaining
- DNS Protection
- Firewall-as-a-service for layer 3 & layer 4 controls

SSE Private Access & ZTNA

Secure Private Access (SPA)

- VPN Access (private app)
- Client and clientless Zero Trust Network Access (ZTNA)
- Firewall-as-a-service for layer 3 & layer 4 controls

SSE Advanced Security (FWaaS, IPS, DLP)

Advanced Security

- Layer 7 FWaaS (Firewall-as-a-service)
- Intrusion Prevention System (IPS) protection
- Data Loss Prevention (DLP)
- Remote Browser Isolation

About DXC

DXC Technology (NYSE: DXC) is a leading enterprise technology and innovation partner delivering software, services, and solutions to global enterprises and public sector organizations — helping them harness AI to drive outcomes at a time of exponential change with speed. With deep expertise in Managed Infrastructure Services, Application Modernization, and Industry-Specific Software Solutions, DXC modernizes, secures, and operates some of the world's most complex technology estates.
