DXC Oracle Fusion AI NOW: AI Assessment & Advisory

Discover the barriers hindering AI adoption and value realization. “We DXC” perform an assessment of your current business processes, review business challenges, and provide a tailored AI implementation roadmap for the identified high-impact AI use cases that overcome the current obstacles and pain points.

Address real business challenges to identify **tangible AI use cases that produce impactful results.**

We will provide a clear path to realizing the **full value of your Fusion AI investment**

In our proven journey, we will..

Engage our Team

We will engage our Oracle & AI-certified specialist for interviews with business users to understand pain points

Our Services Include:

- Comprehensive Fusion AI Readiness Assessment
- Identification of High-Impact AI Use Cases
- Tailored Roadmap
- ROI Analysis & Projections

Deliverables:

- We will create an **AI adoption and value realization roadmap** and an **outline business case** to fully unlock the AI potential of your Oracle Fusion stack and enable maximum return on investment (ROI).

Client Benefits

Recommendations from DXC's roadmaps and outline business cases will lead to:

- **Enhanced Efficiency & Cost Savings:** Focus on high-impact AI use cases that overcome business challenges, streamline operations, and reduce costs (~up to **25% ROI**)
- **Optimized AI Investment:** Identifying potential barriers to help realize the full value of your AI investment.
- **Early AI Adoption:** We partner with you to be the early adopters of Fusion AI in the market, which in turn enables you to deploy AI solutions and realize benefits more quickly.

DXC Oracle Fusion AI NOW: AI Implementation Proof of Value (PoV)

“We DXC” will implement the **most impactful agreed-upon AI use cases** from the roadmap produced at the end of the assessment phase, constantly measuring their success to demonstrate AI's tangible impact on your organization and governance.

Gain data-driven **confidence in AI adoption** by validating the impact of targeted use cases tailored to your organization's needs

Monitor and review the performance of these use cases to assess true **business impact**

In our proven journey, we will ..

Engage our Team

We will engage our Oracle & AI-certified specialist for interviews with business users to understand pain points

Our Services Include:

- Implementation of the most impactful agreed-upon use cases originated from the assessment roadmap
- Facilitate user acceptance testing
- Success measurements & results playback

Deliverables:

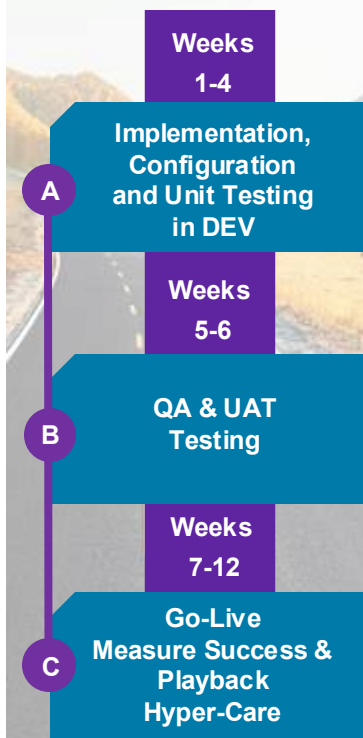

We will **implement** and **measure** the success of five tailored AI use cases, perform **comprehensive testing**, and produce a **playback report**.

Client Benefits

- **Tangible Value Realization:** Implementing and measuring targeted Agentic AI use cases will demonstrate the direct impact on your organization's operations, validating the value of AI.
- **Informed Decision-Making:** Detailed ROI analysis and success metrics provide a clear understanding of AI's potential within your organization, empowering you to make confident decisions regarding your AI strategy.
- **Innovative Possibilities:** Demonstrate the art of the possible by showcasing the full potential of AI-driven solutions, inspiring your organization to drive continuous innovation.
