

Custom Applications Unlocking Value with our Differentiated, Continuous Application Services in Custom Applications

We are a Full Stack Software Engineering Provider trusted to continuously deliver our **Client's Mission Critical applications** at Enterprise Scale

Business Advisory | Digital Journeys | User Experience | Platform Engineering | Operational Resiliency

AI-Powered E2E Service Delivery

Gen AI Custom Applications Platform enhances client value by streamlining the software development lifecycle.

Laser Focus on Business Outcomes

we align our efforts with the Business Realization Framework to ensure that our projects yield tangible benefits.

Enhanced Client Experience

Integrated testing and observability reflect our dedication to improving client experiences through a holistic view of application quality and performance.

Industry Innovation

Strategic partnerships with leading technology providers enable us to stay at the forefront of innovation.

Strategic Partnerships

Extensive industry expertise allows us to tailor solutions to specific client needs.

Awards and analyst recognition in 2024

***ISG** *Named DXC Technology:*

- Leader** in Agile Application Development Outsourcing
- Leader** in Application Quality Assurance
- Leader** in App Managed Services
- Product Challenger** in AI-enabled Application Development

Everest Group® *Named DXC Technology:*

- Leader** in Custom Application Development Services PEAK Matrix® Assessment 2025
- Leader** and **Star Performer** in Mainframe Services PEAK Matrix® Assessment 2024

OUR VISION

**Crafting Custom
solutions for
Unique Business**

We empower our clients by providing customized, domain-specific solutions to meet their unique needs.

**Through
Value-centric
Development**

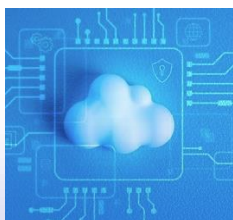

We focus on accelerated value realization, speed to market, new revenue streams, and reduced cost of ownership, maintaining high quality, security and scalability.

**Harnessing
leading-edge
Technologies**

We excel in fusing modern architectures, principles, patterns and technologies to support a composable enterprise.
