

DXC Finance and Accounting Business Process Services

We help you transform your finance operations to return value to your stakeholders through a data-driven operating model.

Pressures to automate and drive transparency

Enterprises of all types face the constant challenge of reducing operational costs. Chief financial officers and their organizations feel the pressure to reduce the cost of finance and make the finance function as efficient, automated and cost-effective as possible while maintaining control and compliance standards.

Finance and accounting (F&A) business processes tend to be manual, drawn out, fragmented and surrounded by legacy technology. They are not tied to business outcomes and lack an end-to-end process flow and metrics to define success.

Moreover, organizations are looking for an improved control framework for cash flow predictions, financial statements, accurate reconciliation and risk mitigation.

Speed-to-value changes and the corporate compliance landscape have prompted enterprises to take a more innovative look at their finance operating models. Businesses

that fail to reinvent these business processes will continue to grapple with inefficiencies that lead to unnecessarily high processing costs. Critically, these businesses are also unlikely to improve their cash flow.

Transform and improve operations

For companies struggling with finance back-office transformation, DXC Finance and Accounting Business Process Services (BPS) address rising costs and generate more working capital in the procure-to-pay, order-to-cash and record-to-report functions.

DXC Technology works in a consultative role to help you understand your current state, define your roadmap and configure an operating model that drives process optimization through a highly tuned managed service. We take advantage of the latest technologies and best practices while leveraging our best-shore delivery centers, language capabilities and experienced finance professionals.

Key benefits

- Save more than 30% on finance costs through DXC global economies of scale, leveraged technology and global industrialized delivery services.
- Leverage configurable, scalable and flexible technology solutions to complement existing investments that can meet complex business requirements.
- Improve control and compliance by establishing a single point of convergence for transaction processes.
- Improve working capital and cash flow with expert analytics and insights that enable data-driven decision making.

Your organization can rely on our end-to-end process automation and enabling technologies to expedite cost reduction and provide faster insights for data-driven decision making that drives real value.

F&A BPS in action

Here are some ways our customers are succeeding by partnering with us:

- **Process automation.** A leading consumer packaged goods (CPG) customer previously processed vendor invoices manually. DXC implemented an end-to-end digital process using cognitive digitization, e-invoicing and robotics, which improved productivity by 51%.
- **Cash flow enhancement.** A world-leading manufacturing company worked with DXC in a cash acceleration program that resulted in \$250 million in cash flow savings.
- **Analytics.** DXC used advanced methodologies, technologies and industry-experienced professionals to recover more than \$17.5 million from a global CPG company's worldwide suppliers.
- **Compliance and control.** With DXC's help, a global manufacturing company reduced aged balances on its bank account from \$72 million to \$4 million and achieved 99.99% on-time reconciliations.

F&A BPS features

DXC's distinctive capabilities include:

- **Transformation methodology.** Our methodology includes a holistic 360-degree analysis focused on customer pain points and also includes benchmark operations.
- **Automation.** DXC delivers a platform for process automation that enables customers to leverage industry-leading robotics technologies and a library of robots at lightning speed, without the complexity and cost that would normally be expected.
- **Operations excellence.** DXC delivers excellence through our global industrialized Intelligent Operations framework and culture of continuous improvement and service excellence.
- **Partner ecosystem.** DXC's best-in-class technologies improve performance for our customers through partnerships with world-class technology providers.

Why DXC?

DXC has more than 25 years of experience providing F&A services through our collaborative model and flexible service configurations that adapt to our customers' business requirements.

Capabilities

- Global footprint — more than 10 leveraged sites and more than 30 languages supported
