Take your employee experience to the next level with DXC Technology and Microsoft 365 Copilot

In today's business landscape, ensuring that your employees can collaborate and work securely from anywhere is not just a goal; it's a necessity. Companies are able to accomplish this — driving productivity, streamlining processes and fostering innovation — by optimizing Microsoft 365 deployments and harnessing the power of AI within these environments.

At DXC Technology, we help our customers design a workplace where employees can seamlessly collaborate, access insights and work at their best, from anywhere. As an early adopter of Microsoft 365 Copilot, we bring you a unique solution that not only enables your business to thrive but also empowers your employees with a better technology experience.

With you on your Microsoft 365 Copilot journey

With DXC Awareness and Readiness Advisory Services for Microsoft 365 Copilot, you can unlock the true potential of Microsoft 365 for your organization. Our solution focuses on understanding your corporate strategy for AI and using Microsoft 365 to drive productivity and value. We enable your Microsoft 365 Copilot journey with the tools to:

- Assess the best opportunities for Microsoft 365 Copilot adoption through Ideation and Art of the Possible workshops

- Review your Microsoft 365 data estate readiness for privacy and security compliance
- Prepare your Microsoft 365 environment to meet Microsoft 365 Copilot's technical requirements, enabling a smooth transition
- Gain real-time intelligence and insights about your employees' technology experience to drive continuous service improvement

Microsoft partnership

DXC enables a personalized, intelligent, secure workplace to elevate employee experiences and improve decision making using data insights. We do this with Microsoft 365, Microsoft 365 Copilot, Microsoft Teams, Microsoft Azure Virtual Desktop, Microsoft Managed Desktop and Microsoft HoloLens.

Experience you can count on

DXC's strategic partnership with Microsoft means that we bring a wealth of experience and deep knowledge of Microsoft 365 solutions to our customers. This expertise enables us to offer skilled guidance and support that is tailored to your unique business requirements, while prioritizing the employee experience. We pride ourselves on delivering customized solutions that align with your organization's needs, for effective and efficient results.
